

SUPERCritical_LONG Campaign (PR2026 Final) — 81 simulations

Extended domain, supercritical f, $\theta=90^\circ$: stability persists at f=2.0

SUPERCritical_LONG — t_{frag} vs f
(▼ = TIMEOUT/stable at that f)

SUPERCritical_LONG Outcomes
(n=81 total)

FRAG: $t_{\text{frag}} = 0.532 \pm 0.211 t_J$
 TIMEOUT: $\beta=0.3, 1.0$ at $f=2.0$ in extended domain — persistent stability
 FAILED: 1 sim (covered by companion long/verylong results)
