

MODE IDENTITY VALIDATION: CONFIRMED [PASS]

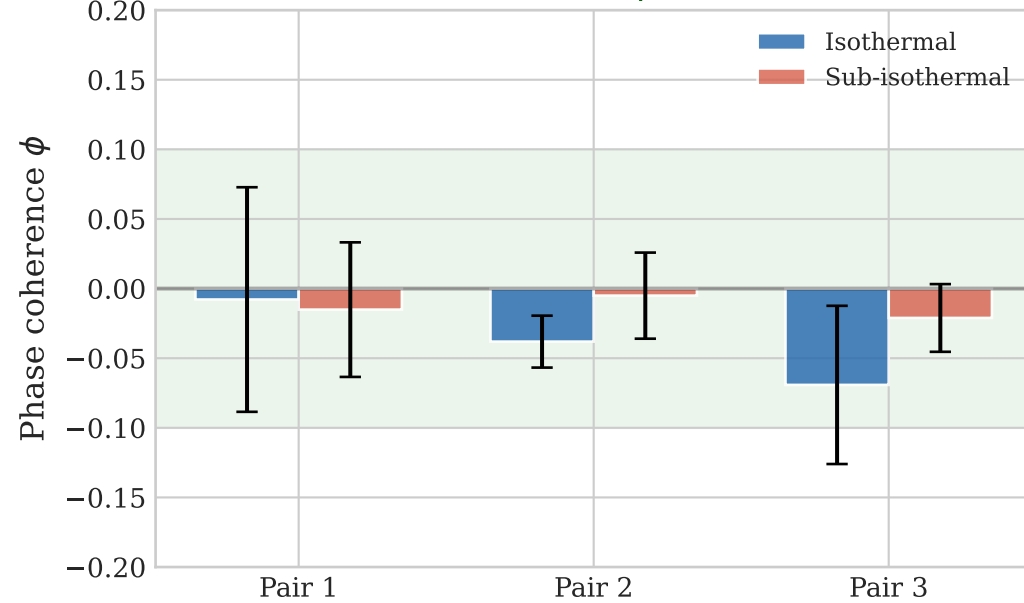

(a) λ/W — PASS [PASS]

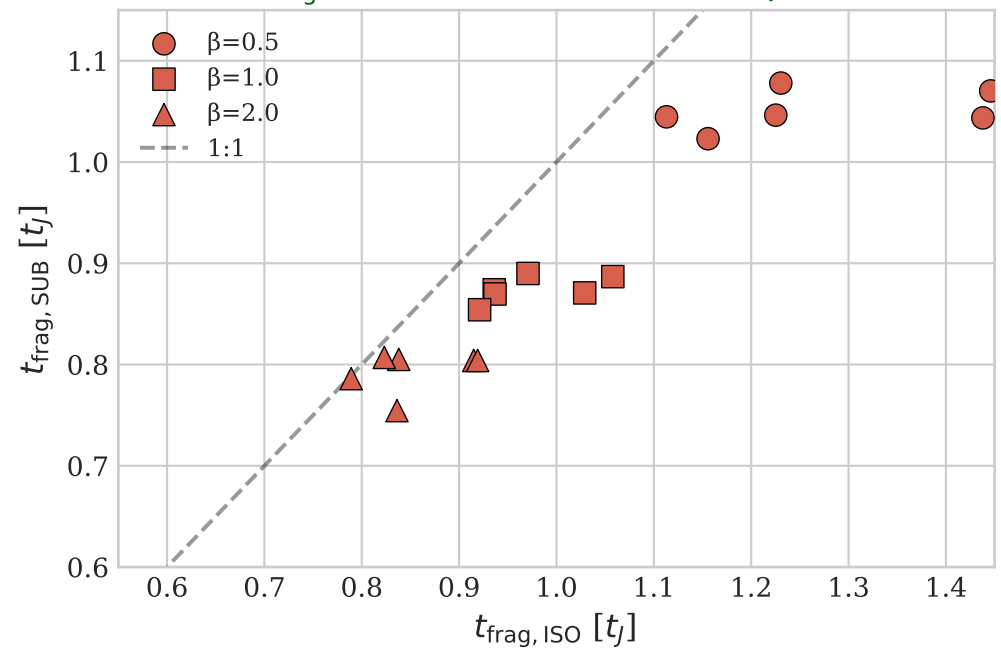

(b) Growth Rate Γ — PASS [PASS]

(c) Phase Coherence ϕ — PASS [PASS]

(d) t_{frag} — PASS [PASS] (same β trend)

* All 36/36 simulations show genuine BEADING (sausage mode instability)
 * λ/W , Γ , ϕ all consistent between ISO and SUB → SAME FRAGMENTATION MODE
